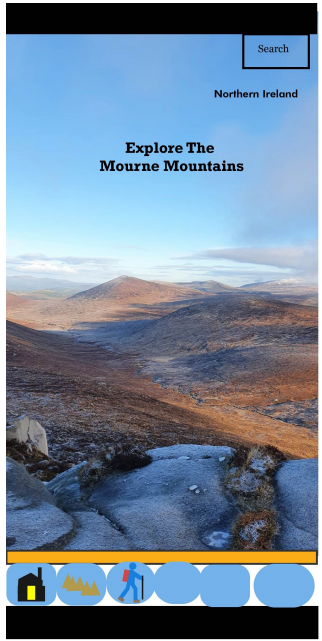
Sean



I like your concept but i feel like your execution could be a bit cleaner and more consistent.
Like the icons for example. Perfecting these things takes time so nice work so far!

Really excited to see what u do for illustrations! Especially on first screen

i like what you've done so far and I'm excited to see how you further develop it

nice colour scheme

maybe look into the layout of type/font

map layout is nice

nice photography

Nice map illustration and mountain/tree icons.
Good concept.

Super cool that you included your own photography! Nice natural colour scheme! App idea is very relevant at the minute.

Maybe just work on the positioning of text to help keep your design more organised, but looks great sean, well done!

Really nice colour scheme and love the inclusion of the map and beautiful home page image.

I think i'd maybe try removing the outline on the yellow bar and remove the blue circles around the icons.

I think you could maybe get away with white text and I'd play about with spacing on the text on your final page and keep heading bigger than body text.

the photo of the mournes is great, maybe keep the typefaces more consistent

Love your map mate. nice use of typography in the home page.
