

An Phiast Sting

Animation Dingle 2022.

Cáithlin Mulligan

Hello. You will find in this folder my pitch to create a sting for next years Animation Dingle. I am very excited to do this project. My concept is that a young lad is eating some chips on a Pier in Dingle and is scared by An Phiast who rises from the Harbor and asks for a taste of one of his chips.

I came up with the concept for this idea myself and have done all the work so far. I am a new student at Ulster University and making a sting is not part of the curriculum. It is at Ballyfermot, BCFE, which is the college I attended the last three years and received my HND Diploma in Animation. I wanted to participate in the festival by creating a short form of animation and have been longing to do so since I entered the YAOTY competition when I was in secondary school. I believe I do have the time to complete this project by myself, but I may recruit fellow students who are interested to help me if my sting is selected ! As I would love to work with a group on this. 😊

Thank You.
