## Core Systems

Dear Sir/Madam

Hello, I am Katie McWilliam a second year student currently studying Interaction Design at Ulster University School of Art. I am really interested in the UI/UX placement opportunity that Core Systems are offering. I want to apply for this placement role as I would love to gain valuable real life work experience as well as working part of a team working on real work that brings value to its customers.

When Rosin and Ellie came into my Interaction class at Ulster I was inspired by the company's values, morals and their willingness to help others in need. As a designer I want to be challenged and make a positive impact on society and help people achieve better outcomes in their lives.

Moreover, I am curious about the work that Core Systems produce and how they utilise technology to make life better for individuals within the justice system. The Core Pathway programme is fascinating as it helps prisoners use cell time productively, preparing prisoners for successful reentry into society as well as keeping them connected with their probation officers.

To conclude, I have a passion for design, and love solving problems for users and delivering solutions that exceed customers expectations. I am a hardworker with a positive attitude and can communicate and collaborate well with others.

Thank you for taking the time to consider my application. If you need any more information do not hesitate to contact me and I hope to hear from you soon. Please find my CV with a link to my portfolio attached along with this letter.

Yours faithfully,  
Katie McWilliam
