i would be incredibly grateful for any opportunity to work. i have a range of experience in the animation field that i believe has given me a strong understanding of the animation pipeline. I would gladly help if needed on any given projects as it is always a new opportunity to learn new skills. i have relevant abilities in many areas of the creative field. I want to take on any work with an attitude to succeed, I am a hard worker, creative, organised, extremely optimistic and i love being apart of a team. I believe having an experience in this field of work would enhance my skillset further and help me enter the industry with relevant capabilities .
