THEME – IDENTITY

JUNO CALYPSO

Juno Calypso is an eye-catching and thought-provoking artist. She is a British photographer who works with self-portraits and the concept of an alter ego. This other persona she plays about with, known as Joyce, tells a story with every series of pictures, such as 'The Honeymoon', 'Joyce' and many more.

The artist explains how this has allowed her to explore the female self and be creative with her identity.

In addition to her personal and unique photography scenes and series, this artist has promoted her work through various campaigns and created installations.

Calypso's work has inspired me in my main workshop as I use a similar approach, utilising self-portraiture and elevating a side of myself others don't see.

Hannah Martin.
