Student Name:

Aoife Conney

Did the introduction / outline for the workshop provide a clear idea of what to aim for?

Yes

Was there enough direction / feedback provided?

Yes

Was I aware that I could seek out and ask for advice if I required it?

Yes

Which part of the workshop did I enjoy the most? Which part of the workshop did I least enjoy?

I enjoyed the many areas of these workshops such as using paper to create an idea that's simple but results in an interesting product, or using materials like clay and liquid metal to create structures and textures. I also enjoyed the concept of creating a piece from clothing such as the denim challenge.

In hindsight, were there aspects of the workshop that I could have handled better / improved upon? (Give examples)

I could improve on my time management skills during workshops that require a little more work to be produced.

Were there activities in the workshop that provided transferrable experiences and skills which could have relevance to future and specialist disciplines? (For example, time management, preparatory and research work, thinking outside the box, pushing outside of comfort zones etc.)

During each of the workshops I was able to further improve my basic skills such as stitching and weaving along with finding more ways of creating interesting patterns and visuals with paper. These workshops helped me to start thinking in various ways that were past the usual common uses for the materials I experimented with.

Would I consider re-visiting this discipline area when it becomes an option in Semester 2? (If so, specify)

Yes, I'd like to revisit the area of fashion and textiles to further improve my skills, along with possibly mixing some techniques learnt in ceramics and metal/jewellery.

Any other comments / reflections :
