Student Name:

Aoife Conney

Did the introduction / outline for the workshop provide a clear idea of what to aim for?

Yes

Was there enough direction / feedback provided?

Yes

Was I aware that I could seek out and ask for advice if I required it?

Yes

Which part of the workshop did I enjoy the most? Which part of the workshop did I least enjoy?

Due to absence of sickness, I didn't partake in all workshops provided for this block, however I throughly enjoyed the days i did attend. I liked the idea of creating an interactive solution to a given problem, and being able to develop that project further into a similar concept for another workshop. For example, the group project I was involved in, created a touch-screen game for the IxD workshop but were also able to improve this idea into a board game as well for the Games Design workshop.

In hindsight, were there aspects of the workshop that I could have handled better / improved upon? (Give examples)

I could further improve my time management skills.

Were there activities in the workshop that provided transferrable experiences and skills which could have relevance to fuure and specialist disciplines?
(For example, time management, preparatory and research work, thinking outside the box, pushing outside of comfort zones etc.)

I was able to learn the understanding of the process of developing big projects, especially in groups such as the IxD and Games Design workshops. This will allow me to further develop the skill in managing a project and being able to create appropriate steps to complete the overall task. I would need this skill if I am to go into Textile, Art, Design and Fashion after Christmas.

Would I consider re-visiting this discipline area when it becomes an option in Semester 2? (If so, specify)

If given the opportunity while further studying fashion, to partake in another workshop for any of the digital courses, I would be happy to take it as I am looking to continue Illustration for a while longer.

Any other comments / reflections :
