

Leonie Smyth
UX Designer Placement

FinTrU
RE: UX Designer Placement Londonderry

Dear Andrew Rossborough,

Whilst researching placements for my next academic year, I was thrilled to find the UX Designer placement with FinTrU. As an ambitious student who is work driven and wanting to learn more within the industry, I believe I would make a great addition to your team.

Innovative approaches and solutions to all challenges are aspects that drive and inspire me. Like FinTrU, my goal is to advance and design solutions to help clients meet their needs through day to day. I'm confident in problem solving, designing user interfaces, wireframing. I also have great knowledge in the following tools, Photoshop, Illustrator, Figma and Microsoft packages. As a team player, I am collaborative with others, consistently looking for valuable insight from my peers. With these qualities I have confidence in my ability to provide positive insight and effort to placement.

For any other information, please see my CV attached. I am eager to talk to you about a placement opportunity and appreciate your consideration.

All the Best,
Leonie Smyth
