Start a conversation with the Doctor

User completed this task with ease, and rated the experience a 5/5.

Check your statistics

User completed this task with ease, and rated the experience a 5/5.

Have you got any additional thoughts or suggestions?

"I like the idea of this app. I think an app like this is important to have for people like myself who have IBS.
The implementation of statistics is a good way to review trends in your symptoms. It worked easily and I was able to find everything that you asked me to find. I think that the buttons and stuff were well placed, and you know where everything is without even having to look hard for it."
